# Croatia in Europe

## MAP OF SLAVONIA

ion in  
ova river  
to the  
addition  
tourism

# VUKOVAR-SRIJEM COUNTY

- placed in the east of Croatia, between rivers Sava and Danube.
- part of Pannonian lowlands,
- thanks to extraordinarily fertile soil, favorable climate, natural resources and a good commercial position, this area has been inhabited since ancient times.
- moderate continental climate (sunny and hot summers, cold winters with snow), the mean annual temp. 11 ° C
- in agriculture fields, vineyards, orchards, forests dominate.
- The main agricultural products are wheat, corn, sugar beets, soybeans, sunflowers.
- County: population 204 768, area 2448km<sup>2</sup>.

## VINKOVCI – YESTERDAY, TODAY AND TOMMOROW

-Vinkovci (population: 35.000 ) is an eastern Slavonian city placed on the river Bosut

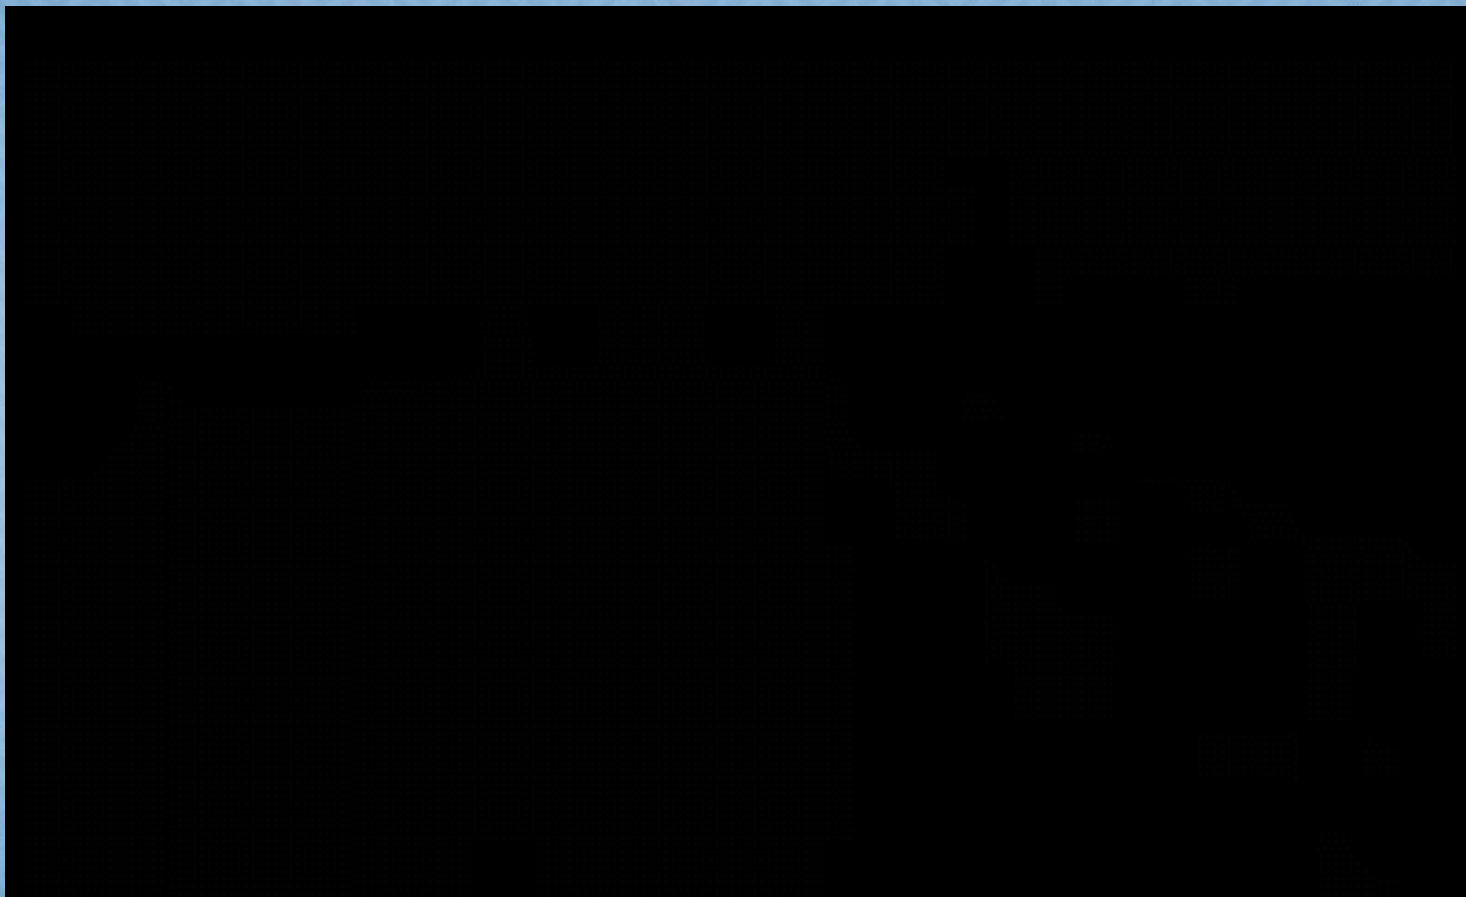

- The area has been inhabited since the ancient Neolithic age, on written monuments Roman city is mentioned:

### ***Colonia Aurelia Cibalae.***

- Today's Vinkovci came about on St. Eli village in the Middle Ages.
- The Austro-hungarian period left Vinkovci a beautiful baroque lake.
- Vinkovci is the birthplace of Roman emperors Valentinian I and Valens.
- The Roman thermal bath is still preserved underground as are several other Roman buildings located near the center of present-day Vinkovci

## VINKOVCI - TODAY

MOVIE PRODUCED BY: *DESIGN STUDIO D, DARKO PUHARIC, VINKOVCI*

# our school...

## OCCUPATIONAL PROGRAMS:

- physiotherapy technician
- medical technician- nurse
- veterinary technician

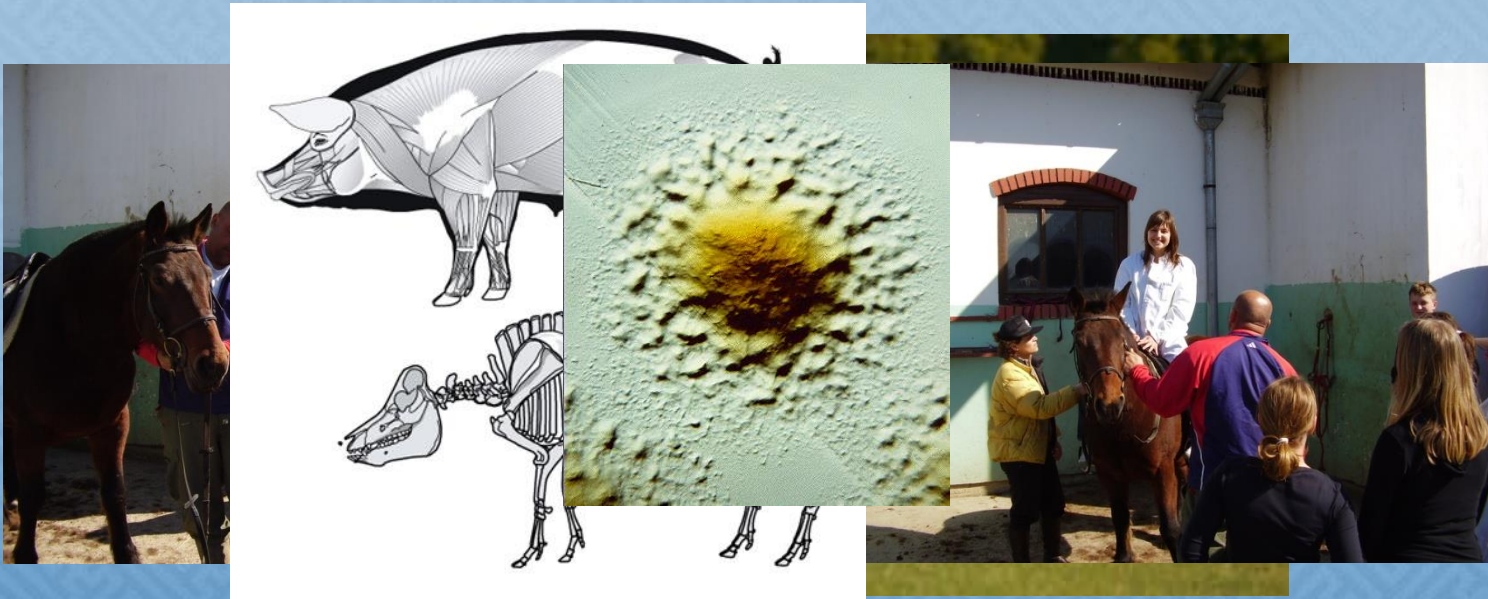

# VETERINARY TECHNICIAN FOUR-YEAR TRADE SCHOOL

## GENERAL SUBJECTS

- All four years
- Croatian, Foreign Languages (English, German), Mathematics, Physics, Chemistry, Biology, Physical Education, Religion or Ethics.
- Over two or one year:
- History, Geography, Latin, Informatics, Politics and the Economy

# TRADE SUBJECTS

- All four years
- Domestic animal breeding
- Practical exercises
- Over two years
- Anatomy and pathology
- Microbiology and contagious diseases

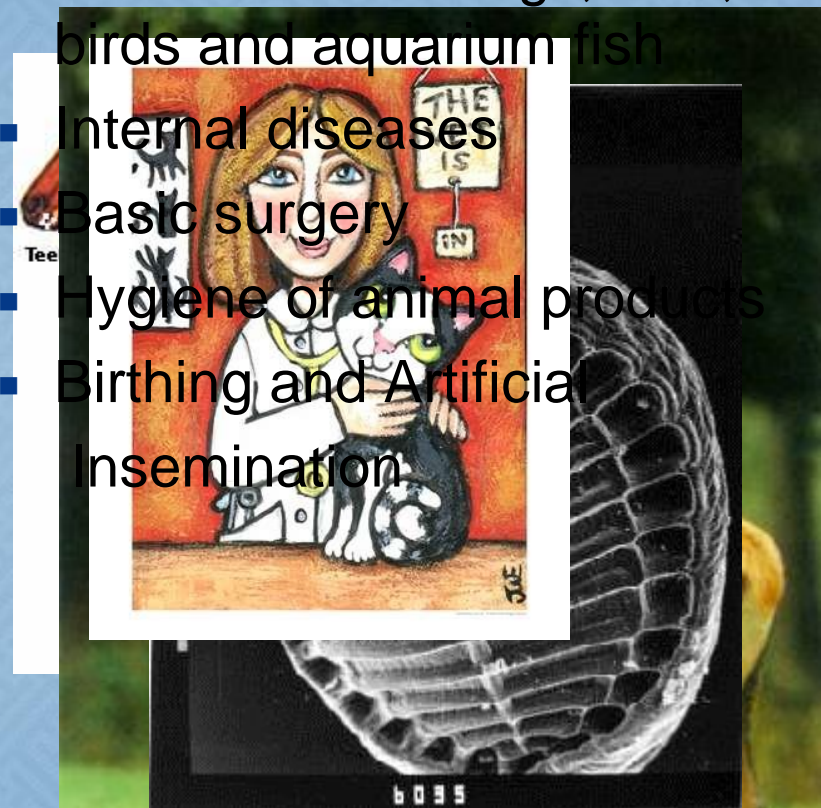

# PROFESSIONAL SUBJECTS WHICH ARE TAUGHT FOR ONE YEAR

- Introduction to the veterinary profession

- Small animals: dogs, cats, birds and aquarium fish

- Internal diseases
- Basic surgery
- Hygiene of animal products
- Birthing and Artificial Insemination

## ABOUT PRACTICAL EXERCISES AND WORK

- In the 1st year it takes place in school – going out and introduction to animals is prepared, as well as work that a veterinary technician on the field does
- From the 2nd – 4th year practical work is done in veterinary ambulances, farms, the Veterinary Institute, professional excursions, etc.

## WHAT WE CAN DO AFTER FINISHING THIS SCHOOL:

- Become employed as a veterinary technician in:
  - Stations
  - Ambulances
  - Veterinary and agricultural pharmacies
  - Farms with intensive animal production
- Pet shops
- Start your own business – so-called self-employment:
  - Breeding of dogs, bees, cattle, swine, horses, etc.

## OR WE CAN FURTHER OUR EDUCATION:

- Thanks to strong general subjects, we have very good preparation for the graduation exam (Matura),
- All four years: Biology, Chemistry and Physics (Biology is applied to the entire profession/ professional subjects)
- Croatian or Foreign languages, as well as Latin

# ARGUMENTS

## FOR :

- Contact with animals
- Vocation after high school
- Possibility of further education
- Possibility of opening own business

## AGAINST:

- Animal contact (smell, allergies, fear, etc.)
- Strong, demanding teaching plan and program
- During the school year we only have 15 days of practical work on the farm

## EXTRACURRICULAR ACTIVITIES

- The possibility of showing music talent is offered
- Acting abilities
- News reporter ambitions
- Studying animal anatomy
- Advancement of computer/informatic abilities
- Film and take photos of significant events
- Sport club - MEDIVET

**Thanks for watching.**
